## RESEARCH OVERVIEW

I build programming support informed by user research and natural multimodal behaviors to help non-expert end-users program robots.

**Keywords:** Human-Robot Interaction, End-User Robot Programming

## EDUCATION

**Johns Hopkins University**, Baltimore, MD

Ph.D. in Computer Science

2018 - present

M.S.E. in Computer Science

2021

**The University of Texas at Austin**

B.S. in Electrical and Computer Engineering

2018

Primary Concentration: Computer Architecture and Embedded Systems

Secondary Concentration: Data Science and Information Processing

## AWARDS AND HONORS

**Johns Hopkins Inaugural Engineering/Nursing Joint Fellowship**

2019

*\$5,000 support for patient bedside robot assistance project*

**Johns Hopkins Howard and Jacqueline Chertkof Endowed Fellowship**

2018

*Endowed fellowship awarded through departmental nomination*

**NSF Graduate Research Fellowship** (Acceptance Rate: 17%)

2018

*Three-year annual stipend of \$34,000 and \$12,000 cost of education allowance*

**University of Texas Graduating Honors**

2018

*Awarded for being in top 20% of Class of 2018 in Cockrell School of Engineering*

**Tenaris Roberto Rocca Scholarship**

2018

*\$2,500 award for demonstrated leadership potential and talent*

**University of Texas Braden Communication Scholarship**

2017

*\$500 award for being the most outstanding technical communicator in the Department of Electrical and Computer Engineering*

**University of Texas University Honors**

2015 - 2017

*Recognized in University Honors list for completing full course load and earning outstanding grades*

**University of Texas Academic Distinction Scholarship**

2014

*Complete support for tuition and fees and \$1,000 stipend*

### RESEARCH AND DEVELOPMENT EXPERIENCE

**Graduate Research Assistant**, Johns Hopkins University, Baltimore, MD      2018 - present  
*Intuitive Computing Lab, Advisor: Dr. Chien-Ming Huang*

- Understanding older adults’ needs in programming physical robot assistance
  - Designed user study to study the potential implications and design requirements for enabling older adults to program physical assistance
  - Collected and analyzed interview data and field notes using qualitative methods
  - Results of project inform future work in enabling physical robot assistance for older populations
- Structuring user learning in training end-users to program robots kinesthetically

- Designed user study to evaluate the effect of different training practices on user performance in kinesthetic teaching of robots
- Collected and analyzed multimodal, subjective, objective, and behavioral user data
- Developed a learning curriculum informed by findings from pilot studies investigating user programming errors and suboptimalities and prior work on curriculum design
- Results of project inform the development of educational tools for supporting initial user learning of robot programming
- Designing user-centric programming aids for kinesthetic teaching of cobots
  - Designed and executed user studies to evaluate the effectiveness of different end-user robot programming interfaces in enabling end-users to program collaborative robots
  - Developed a user interface with editing tools and visualizations to support users in removing errors from robot programs
  - Results of project inform the development of interactive tools to improve programming efficiency and mental models of end-users

**Undergraduate Research Assistant**, UT Austin, Austin, TX

2017 - 2018

*Nuclear and Applied Robotics Group*

- Modeled alignment process for radiographic weld inspection using a control system for a UR3 arm and image-based verification methods
- Assisted with development of radiation scanning sweep validation for Pioneer LX robot
- Designed and tested circuitry for robot power systems

**Summer Intern**, Dell, Round Rock, TX

2017

*Operating Systems Infrastructure Software Engineering Team*

- Modified server applications running on Windows to work with new persistent memory NVDIMM-N technology
- Developed testbed to measure performance enhancement
- Conducted tutorials on server application development for NVDIMM-N technologies to storage/memory teams at Dell
- Presented findings and recommendations on novel memory technologies to Dell executives

**Undergraduate Researcher**, Texas A&M University, College Station, TX

2016

*Rockwell Automation Laboratory, Advisor: Dr. Sheng-Jen Hsieh*

*National Science Foundation Research Experiences for Undergraduates (REU)*

- Developed web-based telecontrol system with joystick input for an articulated robot arm (for use in an internet-accessible lab for robotics education)
- Conducted study to evaluate user experience and system performance during teleoperation

**Undergraduate Research Assistant**, UT Dallas, Richardson, TX

2014 - 2015

*Sensing, Robotics, Vision, Controls and Estimation Lab*

- Assisted in development of vision-based lane detection algorithm for automated driver assistance and autonomous vehicles

## TEACHING EXPERIENCE

**Instructor**, Johns Hopkins University, Baltimore, MD

Fall 2022

*Introduction to Human-Computer Interaction*

Teacher course evaluation: 4.20/5.00 (response: 26 out of 26 students)

- Lecture on a range of topics related to Human-Computer Interaction, including design techniques and evaluation methods, as well as current practices and exploratory approaches
- Design course content such as design projects and assessments

**Teaching Institute Participant**, Johns Hopkins University, Baltimore, MD

2022

*Core Themes: Active Learning, Assessment, and Diversity*

- Practiced teaching to engage and assess diverse students, learned evidence-informed teaching methods, and cultivated partnerships in teaching and learning
- Developed a peer-reviewed lesson plan and facilitated a micro-teaching exercise

**Teaching Assistant**, Johns Hopkins University, Baltimore, MD

Fall 2019

*Introduction to Human-Computer Interaction*

- Gave guest lecture, graded projects and exams, and held one-on-one session to provide assistance and feedback on class projects.
- Hosted office hours to provide course assistance to students

## LEADERSHIP, MENTORSHIP, AND OUTREACH EXPERIENCE

### Graduate Association of Women in CS & ECE

Professional Development Chair

2022 - present

- Organize, lead, and advertise professional development events
- Engage in mentorship opportunities with undergraduates in CS/ECE and local schools

**Speaker**, Girl Scouts Robotics Workshop at Maryland Science Center

2019

- Presented Intuitive Computing Lab's research on designing robots that help people
- Answered questions and assisted girl scouts with robotics projects

## PROFESSIONAL SERVICE

### Conference Paper Referee

International Conference on Robotics and Automation (ICRA: 2022)

International Conference on Human-Robot Interaction (HRI: 2019, 2022)

International Symposium on Robot and Human Interactive Communication (RO-MAN: 2020)

### Journal Article Referee

ACM Transactions on Human-Robot Interaction

IEEE Robotics and Automation Letters

## PROFESSIONAL MEMBERSHIPS

Institute for Electrical and Electronics Engineers (IEEE)
